MEETINGSUITE BY BRAINLOOP APP: RELEASE NOTES COLLECTION

Release Notes 1.0.1 to 1.7.0

MeetingSuite by Brainloop App: Release Notes Collection

INTRODUCTION

We accompany new versions of **MeetingSuite by Brainloop** with a set of **Release Notes**, which document the improvements and fixes we have made.

Use the bookmarks to browse through the Release Notes.

RELEASE NOTES CONVENTIONS

The Release Notes are usually separated into two sections:

- The section **Improvements** contains new or improved features.
- The section **Bug fixes** contains fixed issues.

Security related improvements and bug fixes are attached at the end of their sections. Closed vulnerabilities are accompanied by criticality ratings and CVSS3.1 values.

References given are internal ticket IDs.

MEETINGSUITE BY BRAINLOOP 1.7.0 | RELEASE NOTES

We are pleased to announce a new release of the iOS app MeetingSuite by Brainloop.

Release date: March 2026

Bug Fixes

- **Implemented security-related improvements and fixes.**

MEETINGSUITE BY BRAINLOOP 1.6.12 | RELEASE NOTES

We are pleased to announce a new release of the iOS app MeetingSuite by Brainloop.

Release date: February 2026

Improvements

- **Introduced the web functionality “Action Center” with its features “Tasks” and “Polls”.**
If this functionality is activated for an organization, the **Actions** button is shown in the bottom navigation bar. Accordingly, actions that were created in the web interface of Brainloop MeetingSuite are now also visible within the app. Users can view the details of actions they are involved in and are, for example, able to vote in a poll or to comment on a task.
Reference: BMS-1822, BMS-1823, BMS-1830
- **Added “Shared with me” and “Shared by me” sections to the “Files” menu.**
Items that have been shared with or were shared by users in the web version of Brainloop MeetingSuite are

now also shown in the corresponding folders of the app.

Reference: BMS-1458

- **Simplified the access code reset functionality.**

A new **Forgot your access code?** link was introduced on the access code screen so that users no longer have to enter a wrong code five times to be able to define a new code.

Reference: BMS-1498

- **Added the “Language” setting to the profile settings.**

Users can now change the interface language from within the MeetingSuite by Brainloop app. When selecting the **Language** option, users are redirected to the device settings where they can switch to a different language.

Reference: BMS-1915

Bug Fixes

- **Fixed an issue that occurred when changing the device orientation.**

The app no longer jumps from the **Meetings** or **Resolutions** lists to a details screen when changing from portrait to landscape mode on an iPad.

Reference: BMS-1220, BMS-1904

- **Removed a confirmation message that caused overlapping on an iPad and improved the visual design of the voting confirmation.**

Reference: BMS-1241

- **Fixed an issue where the entries under “General Documents” disappeared after a few seconds.**

The Meeting Agenda and Minutes lists are now displayed permanently.

Reference: BMS-1693

- **Fixed text misalignments in the Meetings list that occurred on an iPad.**

Reference: BMS-1779

MEETINGSUITE BY BRAINLOOP 1.1.6 | RELEASE NOTES

We are pleased to announce a new release of the iOS app MeetingSuite by Brainloop.

Release date: November 2024

Improvements

- **Improved and simplified the sign-in process.**

The process when signing back into an account has been simplified to be quicker and more user-friendly.

Now, the **Server selection** page is shown immediately after opening the app. Here, users can directly select and sign in into their already added accounts. The **Add Account** screen is no longer shown.

Reference: BMS-1454

- **Improved the “About” area for meetings to show key meeting details.**

The **About** area of a selected meeting has been improved to show the most important meeting details. It includes the meeting location and up to three lines of the additional information and invitation texts of the selected meeting. In addition, the **Attendees** area shows the number of meeting participants and the names and profile icons of the first four participants, in the order of their roles. To view all participants, select the **Show all participants** option.

Reference: BMS-1472

- **Added the numbering of agenda items as defined in the web interface.**
Meetings now show the same agenda item numbers as in the web interface of Brainloop MeetingSuite.
Reference: BMS-1471
- **Introduced the option to add annotations to watermarked documents.**
Users can now add annotations and comments to documents that contain watermarks.
Reference: BMS-1358

Bug fixes

- **Fixed an issue that made resetting the access code impossible.**
In case of a forgotten access code, the app now resets itself after 5 incorrect access code entries and allows users to then define a new access code.
Reference: BMS-1499
- **Fixed an issue that caused users to be locked out of the app after changing access codes.**
In a specific case, when a user changed the access code from “simple” to “complex” and then set the slider back to “simple access code”, they could not sign back in into the app. This issue has been fixed.
Reference: BMS-1392
- **Fixed an error that occurred when changing back from a complex access code to a simple code.**
When changing from a complex access code back to a simple code, it was possible to enter letters instead of numbers. This has been resolved.
Reference: BMS-1561
- **Fixed an issue where icons for organizations were shown in red color.**
This issue has been fixed so that all organization icons are displayed in black color.
Reference: BMS-1475
- **Fixed an issue where an error message was displayed when a meeting without an agenda was transferred.**
For these meetings the app used to display an error message. This has now been resolved.
Reference: BMS-1330
- **Fixed an issue where a document did not open when selected from the search results.**
When users search for a document in a data room using the **Search** option, the document now opens as expected when selected.
Reference: BMS-1324
- **Removed the “Shared with me” and “Shared by me” links from the “My data room” view.**
The **Shared with me** and **Shared by me** options have been removed from the app as they are technically not implemented at the moment.
Reference: BMS-1497

MEETINGSUITE BY BRAINLOOP 1.1.5 | RELEASE NOTES

We are pleased to announce the release of MeetingSuite by Brainloop 1.1.5.

Release date: May 2024

Improvements

- **Implemented the feature to allow the download of all documents associated with a meeting for offline use.**
If users toggle **Use offline** within a specific meeting, all documents associated with this meeting will be downloaded to the iOS device. Users can afterwards work with the documents even if no internet connection

is available. If users deactivate **Use offline** all downloaded documents will be deleted from the iOS device, downloads in progress will be cancelled.

Reference: BMS-1099

Bug fixes

- **Fixed an issue that prevented users from opening watermarked documents in Flows.**

Reference: BMS-1038

MEETINGSUITE BY BRAINLOOP 1.1.2 | RELEASE NOTES

We are pleased to announce the release of MeetingSuite by Brainloop 1.1.2.

Release date: April 2024

Improvements and Bug fixes

This update of MeetingSuite by Brainloop improves the performance and stabilizes the app. It also contains several bug fixes.

Since those improvements and corrections primarily affect to internal processes, they are not listed in detail here.
